

IMPORTANT NOTICE

The COVID-19 pandemic is spreading throughout Australia and South West Community Care is responding to changes as they occur.

At this stage, the risk of infection is considered to be moderate and the services we deliver to you in your home will remain the same. We will let you know if these services are to change or be reduced in the future.

Unfortunately we have had to cancel our social centre groups and outings, based on the Government's advice to limit the number of people gathering together. We will re-instate the groups when we are given the direction from the Government.

We have attempted to contact every single one of our consumers as we need to know how you are and whether there are specific things we can do to assist you. If you haven't been contacted within the last two weeks—please phone your local SWCC office immediately.

Almost all of our contact with you will be by phone, text or email for the next few weeks. Please keep in touch! Don't forget to phone us if your circumstances change or you begin to feel unwell.

Our intention is to provide you with services and support for as long as possible.

Kind regards

Claire Roach, CEO
